ABOVE & BEYOND

Ever since the first Land Rover vehicle was conceived in 1947, we have built vehicles that challenge what is possible. These in turn have challenged their owners to explore new territories and conquer difficult terrains. Our vehicles epitomize our brand. Vehicles with exemplary design credentials and engineering capabilities. Which is how we continue to break new ground, defy conventions and encourage each other to go further. Land Rover truly enables you to make more of your world, to go above and beyond.

DESIGN

TECHNOLOGY

PERSONALIZATION

DESIGNED. LIKE NO OTHER

How do you redefine an icon? Push harder. Dig deeper. You go above and beyond. You capture its very essence. Then you reimagine it. You design, engineer and build it without compromise. Until you've created a vehicle that's absolutely of the moment. One that's visually compelling, with a go-anywhere-do-anything attitude and toughness at its very core. Capable of great things, this is Land Rover Defender. It couldn't be anything else.

Off-road driving requires advanced training and experience. These activities may result in injury and/or property damage. Always check your route, surfaces and surrounding areas before entering and exiting unsurfaced roads and frozen terrain.

Vehicle shown is Defender 90 S in Pangea Green with optional Satin Protective Film and optional features fitted.

Specifications, optional features and their availability may differ by vehicle specification (model and powertrain), or require the installation of other features in order to be fitted. Please contact your local Retailer for more details, or configure your vehicle online.

CAPABILITY

PRACTICALITY

TECHNOLOGY

PERSONALIZATION

Everything about Defender exudes quiet confidence; from its purposeful stance to its reductive, sophisticated surfaces, its integrity is beyond reproach. Both highly desirable and seriously capable. Tough, durable and highly functional, the interior of the Defender bears testimony to the vehicle's spirit of adventure. Structural elements are made of robust materials. Intuitive technologies - like those you're more likely to find on a smartphone - deliver a connected, engaged drive without taking anything away from the vehicle's ambience. Added to which, everything has been designed with practicality in mind. With an optional front jump seat¹ and center console², the space can be configured any number of ways. Including yours.

¹Model dependent.
²May require fitment of additional features.

PURPOSEFUL DESIGN. ENDLESS POSSIBILITIES

Defender is our most capable Land Rover vehicle yet. You can opt for either a 90 or 110 body design together with a choice from three levels of finish; S, SE and HSE. The differences include their individual wheels - size and style - interior trim and levels of technology. Both body designs are available with five or six seats¹, with 110 offering the option of a third row with 5 + 2 seats².

Select from Defender, Defender X-Dynamic, Defender XS Edition, Defender X, Defender V8, and Defender V8 Carpathian Edition - and four Accessory Packs, each with a distinctive character. It all adds up to the greatest possible levels of personalization.

 BUILD YOUR OWN

¹Model dependent. May require fitment of additional features. ²Model dependent. Only available as part of a pack.

NEW TO DEFENDER

DEFENDER V8

Building on the unmatched capability and optimum durability of the Defender, Defender V8 offers an even more engaging off-road experience and an agile on-road experience. The quad exhaust offers a rich, deep sound and adds to the already powerful on-road presence and visual appeal of the Defender. The Terrain Response® Dynamic Program, exclusive to Defender V8, builds upon the vehicle's capable nature*. Climb inside and you will experience a true driver's vehicle, with interior touches and settings available exclusively to V8. Throttle connection is tuned for maximizing on-road character and off-road control*. The paddle shifters provide quick gear changes and added convenience. Available in 90 and 110.

TECHNOLOGY

PERSONALIZATION

Impressive proportions and a reassuringly recognizable silhouette help define the arresting looks of the Defender. While short overhangs, great ground clearance and upright front and rear elevations give credence to the vehicle's capabilities. Floating bollards and alpine lights add to its personality, with solid shoulders and powerful squared-off wheel arches that communicate the vehicle's purposeful stance. This is design with undoubted integrity. And unrivaled purpose.

DESIGN

ACCESSORY PACKS

CAPABILITY

PRACTICALITY

TECHNOLOGY

PERSONALIZATION

Approachable. Confident. No nonsense. With its compact, upright look, the Defender front profile features a raised hood, sculpted grille and detailing. Together with such characterful touches as round headlights and some of our most sophisticated surfaces yet, these aspects help reinforce the vehicle's overriding sense of capability.

DESIGN

ACCESSORY PACKS

CAPABILITY

PRACTICALITY

TECHNOLOGY

PERSONALIZATION

A celebration of design and functionality. The perfect fusion of form, vertical stance and attitude. From behind, the vehicle looks both utterly modern and perfectly planted. While details like the side-opening tailgate with externally mounted full-size spare wheel and characterful tail lights all point to the distinctive nature of the Defender.

DURABLE INTERIOR MATERIALS

The interior of the Defender features durable materials in areas that need it most. Hard-wearing seat materials include Windsor leather combined with Steelcut Premium wool textile. A choice of veneers and finishers are available including open pore wood with a Rough-cut Walnut or Natural Smoked Dark Oak veneer.

In the cabin you'll find our highly durable Robustec. Its PU platelets are incredibly hardwearing and abrasion resistant. So much so, in fact, that when the fabric was tested it passed all usual tests with flying colors, replicating a lifespan equivalent to 30 years.

Defender V8 has exclusive touches such as Ebony Windsor leather seats with Miko suedecloth and Robustec accents, a unique Alcantara suedecloth steering wheel rim and leather gear shifter.

MONOCOQUE ARCHITECTURE

Unique monocoque architecture contributes to Defender being the toughest and strongest vehicle we have ever created. It has triple the torsional rigidity of a body-on-frame design. While being lightweight and engaging to drive.

TESTED TO THE EXTREME

Three-quarters of a million miles of on and off-road drives. 45,000 individual tests. From 122°F to -40°F. Crossing the dunes of Dubai to sweeping down the straights of the Nürburgring. We've conducted altitude tests, drenched Defender in 26,966 US gallons of dyed water in our monsoon facility and engineered its tires to withstand greater impact. In fact, we've gone to more challenging extremes than ever before to create a vehicle that's capable of great things. This is Defender.

 BUILD YOUR OWN

GO ALMOST ANYWHERE, DO ALMOST ANYTHING

Defender has been engineered so you can dream bigger.
Go above and beyond.

DESIGN

CAPABILITY

PRACTICALITY

TECHNOLOGY

PERSONALIZATION

ALL WHEEL DRIVE (AWD)*

Compelling performance. Off and on road. The system intuitively controls the torque distribution between the front and rear axle. On challenging surfaces, such as sand, grass or snow, torque can be balanced between the front and rear wheels to maximize traction. In extreme conditions, where the front or rear wheels lose traction, 100 percent of engine torque can be distributed to the opposite axle for optimum grip. Our Intelligent AWD System* takes this even further by allowing variable torque distribution, resulting in a more precise and dynamic on-road performance and higher torque capacity - all without sacrificing any of the Defender inherent off-road capability. It's your world. Take command.

TWIN-SPEED TRANSFER BOX*

An additional set of lower gears can prove invaluable in challenging conditions such as steep inclines or declines, off-road driving or when towing.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

Vehicle is shown with accessory Front Expedition Protection System. It improves off-road capability by increasing the front approach angle. Also shown is the Explorer Pack and Deployable Roof Ladder.

COIL SUSPENSION AND ELECTRONIC AIR SUSPENSION

The coil sprung suspension system combines double wishbones at the front with an advanced multi-link rear suspension, to create an agile and responsive chassis. A comfortable and capable drive is ensured by Electronic Air Suspension¹. Select from an access height of 1.6" below normal ride height, to an extended height of up to 3.0". For extreme off-road conditions, a further extended ride height of 2.8" is available. Even across unsteady surfaces it provides exceptional wheel articulation and poise*.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

¹Only available as part of a pack. Model dependent.

ELECTRONIC ACTIVE DIFFERENTIAL

On or off road. In ice, rain or snow. The optional Electronic Active Differential¹ helps ensure the greatest level of traction. It does so by controlling the slip between the left and right wheels on the rear axle, helping to deliver exceptional capability*.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

¹Only available as part of a pack. Model dependent.

-  Grass, Gravel, Snow
-  Mud and Ruts
-  Sand
-  Rock Crawl¹
-  Wade¹

TERRAIN RESPONSE® 2 DYNAMIC PROGRAM

Exclusive to Defender V8, Terrain Response 2's Dynamic Program provides added precision to the off and on-road capability of the Defender. This means even tighter body control with flatter handling and sharper responses*. The engine, gearbox response, steering weighting and V8 powertrain are all tuned by Dynamic Program. This has been specifically designed to optimize performance on low friction surfaces such as tarmac, sand and dirt roads.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

Vehicle shown is Defender 110 V8 in Carpathian Grey.

HILL DESCENT CONTROL

Difficult slopes? Hill Descent Control (HDC®) assists you with tricky descents by maintaining a constant speed and applying braking separately to each wheel. Hill Launch Assist is designed to help prevent the vehicle from rolling backwards as it pulls away on an incline. The vehicle also utilizes Gradient Release Control, which is designed to prevent the vehicle accelerating too quickly on a steep incline when the driver releases the brake*.

ALL TERRAIN PROGRESS CONTROL (ATPC)

All Terrain Progress Control (ATPC)¹ is a state-of-the-art optional system¹. It enables you to set and maintain a steady speed in challenging conditions such as slippery surfaces, including mud, wet grass, ice, snow and dirt roads. Operating like a conventional cruise control system, it functions between 1.1 mph and 18.6 mph**, helping the driver to maintain concentration on the terrain ahead*.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. **Always follow local speed limits.

¹Only available as part of a pack. Model dependent.

DESIGN

ACCESSORY PACKS

CAPABILITY

PRACTICALITY

TECHNOLOGY

PERSONALIZATION

WADING

Life has a habit of throwing unexpected challenges our way. That's why Defender has a wading depth of 35.4"¹, so crossing water need not be one of them. The Wade Program in Terrain Response[®] raises the vehicle using Electronic Air Suspension^{2*}, while Wade Sensing uses ultrasonic sensors in the door mirrors to visually and audibly alert you if the water approaches the vehicle's maximum wading depth^{**}.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. **Driving in floodwaters or moving water should be avoided. Driving through water can be extremely dangerous. The Wade Sensing feature only detects depth of water the vehicle is in at the present time and not of water ahead or around the vehicle. Therefore, Wade Sensing cannot predict whether it is safe to proceed and cannot detect steep drops in grade around the vehicle. The driver is responsible for determining the conditions of the route being driven.

¹Coil Suspension 33.4". Air Suspension 35.4". ²Only available as part of a pack. Model dependent.

TOWING*

Whatever you take. Wherever it is you decide to go. The Defender has a towing capability of up to 8,200 lbs which means it can readily respond to some of the most challenging demands. Combined with this is the optional Advanced Tow Assist¹, which allows you to reverse a trailer while Defender takes care of the counter-steering. The Touchscreen** will also display both the current and desired trailer trajectory¹.

*Never tow beyond a vehicle's permissible towing capacity. Before towing, please consult the owner's manual or your local authorized Land Rover Retailer for more detail. **Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use mobile phones and other devices, even with voice commands, when it is safe to do so.

¹Only available as part of a pack. Model dependent.

WINCHING*

Pulling power and sheer strength are demonstrated with the Remote Control Electric Winch¹ accessory. This has a maximum pulling force of 10,000 lbs and can be operated up to 147 feet away. It's the kind of no-nonsense practicality you need, say, when you're in the middle of the forest. Learn how to check, prepare, maintain and use a winch at one of our Experience Centers.

[BOOK AN EXPERIENCE DAY](#)

*Before using the winch, please consult the owner's manual or your local authorized Land Rover Retailer for more details.

¹Not compatible with Front Expedition Protection System or 'A' Frame Protection Bar.

*With Electronic Air Suspension in off-road height and tow eye cover removed. Fitting of side tubes or side steps may affect the off-road capability of the vehicle. Vehicle shown is Defender 90 S in Pangea Green with optional Satin Protective Film.

GAS

There are three engines available for Defender: P300 4-cylinder Gas, P400 6-cylinder Gas or the new P525 8-cylinder Gas. Each has been optimized for specific attributes to cater for all needs.

The Defender gas engines are powerful, which can provide an engaging and direct driving experience. They are refined and are suited to shorter, stop/start journeys.

All engines are equipped with intelligent Stop/Start technology which is designed to reduce emissions.

GAS MHEV

Mild Hybrid Electric Vehicle (MHEV) technology is fitted to the 6-cylinder P400 engine. It harvests and stores energy normally lost during vehicle deceleration and intelligently redeploys it to increase the engine's efficiency. This system helps to boost the vehicle's performance.

- 1 48V LITHIUM-ION BATTERY
- 2 48V/12V DC-DC CONVERTER
- 3 MEDIUM VOLTAGE JUNCTION BOX
- 4 BELT-DRIVEN INTEGRATED STARTER GENERATOR
- 5 48V ELECTRIC SUPERCHARGER

Please refer to the accompanying Technical Specification for full details.

FUNCTIONAL. WHENEVER. WHEREVER

When we set out to create Land Rover Defender, one of our priorities was to make it as practical for you as possible.

CONFIGURABILITY

When you build your own Defender, you can get everything you want. You can choose between a front jump seat, or a front center console with a refrigerator¹. It's the ultimate personalization. The cargo space capacity provides ample room for all your equipment.

¹Only available as part of a pack. Model dependent.
